1. Exterior Ramp	Abrupt changes in level exist on the exterior wooden ramp.	4.1.2 (2) 4.5.2	According to ADAAG, changes in level up to 1/4 in (6 mm) may be vertical and without edge treatment (see Fig. 7(c)). Changes in level between 1/4 in and 1/2 in (6 mm and 13 mm) shall be beveled with a slope no greater than 1:2 (see Fig. 7(d)). Due to warping of the wooden surface, abrupt changes in level exist measuring 1-inch.  Modify the ramp surface to ensure that changes in level do not exist beyond 1/4-inch. Note: We also question the slip resistance of the wooden ramp surface. Generally, wooden surfaces do not meet the slip resistance coefficient defined by ADAAG.	M ®	Н	M	0	\$500	ADAAG

4. Audio Display	The audio display in the Hall of Presidents is not accessible to individuals who are deaf or hard of hearing.	Title II TAM	The program access provisions of Title II require all programs and services to be accessible. Generally, audio presentations should also be provided in an alternate format at the request of individuals who are deaf or hard of hearing. Make available a printed version of the audio presentation where necessary.	Н	Н	M	9	\$200
